THE PROBLEM

Fragmented Emergency Information.

During a crisis, critical information gets trapped in silos — across different platforms, departments and people.

The result? Delayed responses, missed alerts and higher risks for those who need help the most.

*Same incident.
Different voices.
No single view.*

THE CONSEQUENCES

Slower response time
Critical help reaches late.

Missed information
Important alerts get lost.

Duplicated efforts
Resources are not used well.

Higher risk
More lives and property at stake.

*Better coordination
can save lives.*

Because in a real emergency...
information shouldn't be fragmented.

THE TWIST

What if the same emergency could become intelligence?

Messy. Unstructured. Multilingual.
Gemini turns it into a clear, actionable incident.

Real people.
Real messages.
Any language.

From chaos...
to clarity.

Structured Incident

Verified | Ready for action

Smarter response.
Safer communities.

Watch one emergency travel through SaharaAI.

From a citizen's SOS to coordinated response — in real time.

One incident.
Many hands.
One platform.

SaharaAI

Gemini at the Core

AI x PEOPLE x INDIA

05 / 12

Gemini is not decoration. We use it to make sense of **chaos**.

From unstructured, multilingual emergency reports
to structured, actionable intelligence.

Gemini

Multimodal + Multilingual + Real-world

The AI Pipeline

Safety through validation. Action through intelligence.

Input

Text / Voice / Image
(any Indian language)

Gemini

Understands &
classifies

Validation

Checks, verifies,
reduces false alerts

Action

Creates incident
& triggers response

Four Key Jobs for Gemini

01 Multilingual Understanding

Detects and understands
Indian languages and dialects.

Gujarati ગુજરાતી
Hindi हिन्दी
English English

+ more...

02 Multimodal Understanding

Processes text, voice, images
and location together.

Text Voice Image Location

03 Emergency Intelligence

Identifies incident type,
severity and people at risk.

Gemini Analysis

Incident Type Flood + House Trapped
Severity **Critical**
People at Risk 3
Location Anand, Gujarat

04 Structured Extraction

Turns messy reports into
validated incident objects.

```
{  
  "incident_type": "Flood",  
  "severity": "Critical",  
  "people_at_risk": 3,  
  "location": "Anand, Gujarat",  
  "source_language": "Gujarati"  
}
```

From a chaotic message...

- ✓ Location: Anand, Gujarat

From unstructured data to actionable intelligence.

THE RIPPLE EFFECT

One Incident. Many Coordinated Actions.

SaharaAI doesn't just alert — it connects the right people, resources and information, so help reaches faster and safer.

Right people
Right information.

Right resources
Right time.

Safer communities
Stronger India.

*From one report
to a coordinated
response.*

Rescue Teams
Critical response required.

- ✓ Nearest team dispatched
- ✓ Equipment & support

Hospitals
Prepare emergency response.

- ✓ Alerted with incident details
- ✓ Bed & resources ready

NGOs & Volunteers
Support and assistance.

- ✓ Nearby volunteers notified
- ✓ Relief resources coordinated

Command Center
Track and manage incident.

- ✓ Live updates
- ✓ Resource coordination

Nearby Citizens
Road warning issued.

- ✓ Avoid affected area
- ✓ Get safe routes

Navigation
Alternate routes suggested.

- ✓ Real-time traffic update
- ✓ Faster, safer travel

The Result

- ✓ Faster response
- ✓ Better resource use
- ✓ Less duplication
- ✓ Safer roads & communities
- ✓ More lives saved

THE SAFETY LAYER

Even Without Internet, SaharaAI Stays On.

Disasters don't wait for connectivity. SaharaAI is built to work in low-network and offline environments, ensuring help is always within reach — no matter where you are.

Offline Mode

Works without internet using on-device AI and cached data.

CONNECTIVITY
INDEPENDENT

Local Data Storage

Stores maps, alerts and critical information securely on the device.

YOUR DATA.
YOUR CONTROL.

Smart Sync

Automatically updates once connectivity is restored.

SEAMLESS
TRANSITION

Optimized Performance

Lightweight, efficient and battery-friendly for longer use.

BUILT FOR
REAL-WORLD
CONDITIONS

*No network?
No problem.*

Works Offline

On-device AI +
Cached Data

Offline Maps & Alerts

- ✓ Disaster zones
- ✓ Evacuation routes
- ✓ Essential contacts
- ✓ Medical help

✓ Remote Villages

✓ Disaster Zones

*Help reaches
further.*

Different Regions. One Shared Goal.

From mountains to coastlines, cities to villages — SaharaAI adapts to India's unique needs, languages and challenges.

*Different regions.
Different needs.
Same protection.*

22+
Official Languages

Multilingual support
for every citizen.

28 States & 8 UTs

Region-specific
alerts and coordination.

**1.4+ Billion
People**

Inclusive, accessible,
equitable.

Diverse Environments

Urban, rural, coastal,
hilly, forest, remote.

Multilingual Support
Text, voice, and alerts in local languages.

हिंदी | தமிழ் | తెలుగు | বাংলা | मराठी | + more

Local Context Awareness
Understands region, terrain, and real-time conditions.

Hills | Coasts | Floods | Heatwaves | Cyclones

Community-Centric
Works with local volunteers, NGOs and government teams.

Local Teams | NGOs | Civil Society | Government

Accessible for All
Simple, clear, and easy to use — even in low-connectivity areas.

Low Bandwidth | Low Literacy | Voice First | Visual + Audio

*One platform.
All of India.*

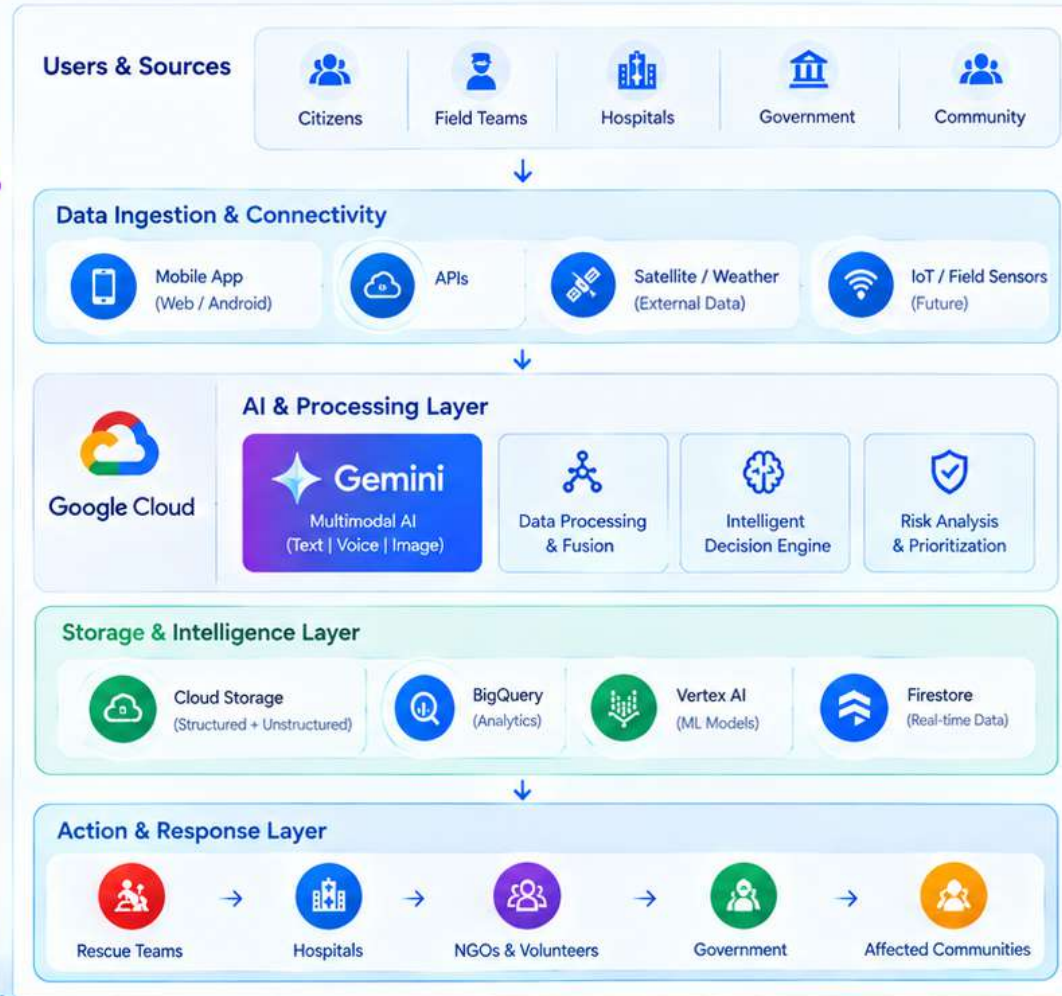

THE TECH FOUNDATION

Built on Google. Designed for India.

A secure, scalable and intelligent architecture that brings together Google Cloud, Gemini and real-world connectivity — to turn every SOS into coordinated action.

- Reliable Cloud Infrastructure**
Scalable, secure and always available.
- Data Security & Privacy**
Responsible AI with strong protection measures.
- Low Latency**
Faster response when every second matters.
- Sustainable & Efficient**
Optimized for performance and environmental care.

Why Google Technology?

- Gemini**
Advanced multimodal intelligence
- Google Cloud**
Secure, scalable, global infrastructure
- Vertex AI**
Build and deploy custom AI models
- BigQuery**
Real-time analytics and data insights
- Maps Platform**
Location, routing and geospatial data

The Result

- ✓ Faster incident response
- ✓ Better resource allocation
- ✓ Less duplication
- ✓ Smarter decision making
- ✓ Stronger, connected communities

*Google technology
